Project Title: *Spider-Man: Into the Spideverse*

I would like to build a multi-page website about the 2018 animated film *Spider-Man: Into the Spideverse*. I think it would be best to have a navigation bar at the top of the site that scrolls with the page. I would also like for the general design of the site to match that of the film, which is heavily inspired by superhero comic books and urban street art.

- **Home page (overview)**
 - Gives basic context for the film and its production
 - Text can be taken from the opening section of the Wikipedia article
 - No need to include everything! It would be too much and too repetitive
 - Allow for viewers to familiarize themselves with the general premise and focus of the movie
 - Provide an instant sense of the film's visual stylings
 - Links to other pages available within the text for really easy navigation (maybe)
- **Plot**
 - Body copy comes from section of the same title on Wikipedia
 - If this seems like too much, let me know- we can definitely work with a summary or shortened text
 - Make sure to include a spoiler warning at the top!!
 - Feature a few screencaps dispersed in relevant locations
 - I can provide these if necessary!
- **Characters & Cast**
 - See "Cast" section on Wikipedia
 - Just a simple list with descriptions
 - I'm currently hoping for pictures of all the characters, but we can bump that down to just major characters if need be
 - Focus on the characters rather than their voice actors
 - Characters to include:
 - Miles Morales/Spider-Man (Shameik Moore)
 - Peter B. Parker/Spider-Man (Jake Johnson)
 - Gwen Stacy/Spider-Woman (Hailee Steinfeld)
 - Jefferson Davis (Brian Tyree Henry)
 - Wilton Fisk/Kingpin (Liev Schreiber)
 - Aaron Davis/Prowler (Mahershala Ali)
 - Spider-Man Noir (Nicolas Cage)
 - Peni Parker/SP//dr (Kimiko Glenn)
 - Peter Porker/Spider-Ham (John Mulaney)
 - May Parker (Lily Tomlin)
 - Olivia Octavius/Doc Ock (Kathryn Hahn)
 - Mary Jane Watson (Zoë Kravitz)

- Rio Morales (Luna Lauren Velez)
 - Peter Parker/Spider-Man (Chris Pine)
- **Animation and Design**
 - See the subsection of the same name under “Production”
 - No need to include every chunk of text here- pull out things that are particularly relevant to comic book styling and unique animation effects
 - Also include some images as examples
 - Gifs would be cool but I’m not really sure how to incorporate them with what we know? I’ll leave that up to your skill level
 - I want it to be obvious how much this film really innovated within the fairly stagnant medium of animation!
- **Accolades**
 - Don’t worry about this page if you don’t have time!
 - Pull out some notable/interesting quotes from the “Reception” section of the article
 - Definitely doesn’t need to be as in-depth as the other pages, more just fun facts about how well the film has been received
- **Sources**
 - Exactly what it says :)
 - Wikipedia, images, etc etc etc
